ANATOMY

OF A SUSPENSION SEAT

FRAME

Onyx-Coated:

All of our suspension seats are onyx powder-coated to a premium level preventing rust from corroding the frame.

Made In The USA:

Built with pride here in Southern California using a mixture of 0.65 and 0.95 3/4" thick steel tubing MiG welded to create the best suspension seats on the market.

FITMENT

Rip Resistant Mesh Liner:

Our suspension liners are rip resistant and vinyl-nylon coated for increased durability, which dampen the shock and vibration a seat will incur during rough riding, creating the suspension seat feeling.

CUSHION

FlexFoam Gel Infused Cushion:

Designed with comfort in mind. Constructed with a 3-stage foam cushion with cooling top layer that allow for more comfortable rides with less body fatigue.

COVER

Optimal Degree:

We're obsessed with creating the optimal driving position in whatever you drive and our 120 degree driving angle offers a natural spine position for increased comfort and alertness while driving.

Unique Offerings:

PRP offers an industry leading amount of options to truly customize your seat, your way.
